

Private, Verifiable AI For Sensitive Files

AI-powered collaboration on document-intensive confidential matters — built for lawyers, arbitrators and professionals who need AI they can trust and verify.

Master your Matter

AI-assisted document review and annotations across entire matters.

Verify AI Responses

Pincite citations with a split-screen interface — check every claim against the source.

Collaborate Securely

Workspace isolation with granular access permissions for every member, document and conversation.

Key Features

Matter-Based Collaboration

Compartmentalise documents and AI conversations by matter. Share access with collaborators inside or outside your organisation; set granular permissions per member, document, conversation and annotation.

AI-Assisted Document Review

Upload large numbers of documents and entire folder structures. Get instant AI summaries and classifications, then add custom AI-coded fields directly in an interactive sources table.

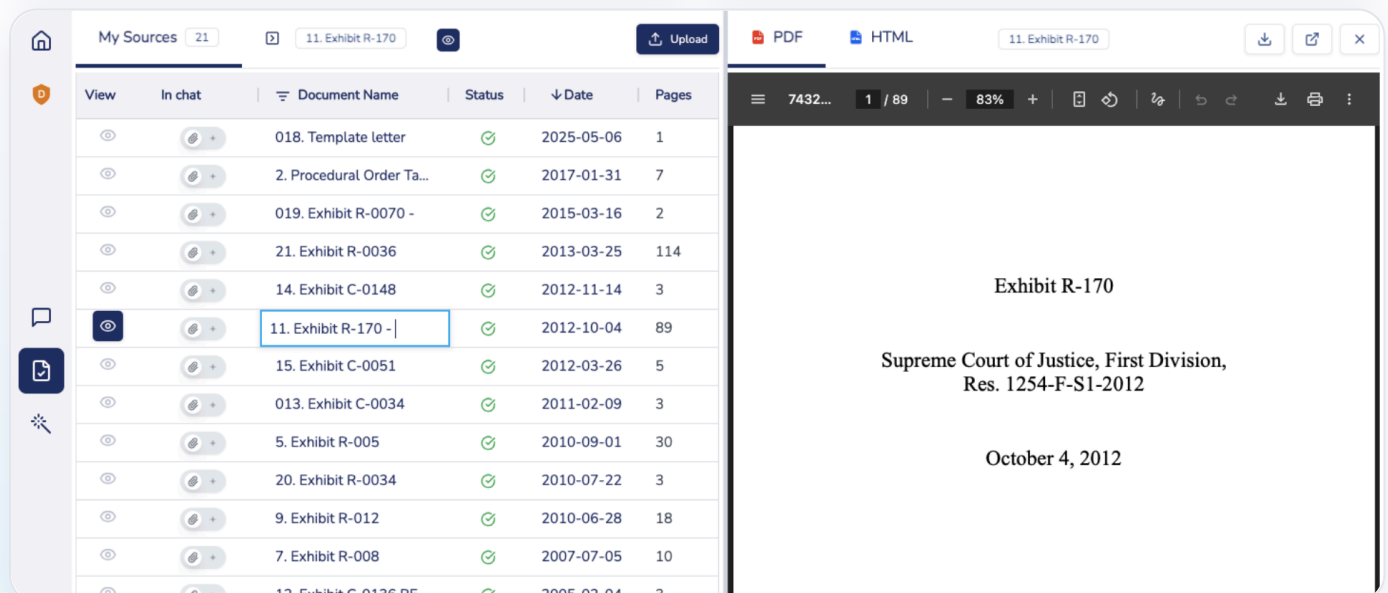

Accurate Pincite Citations

Paragraph-level citations for every proposition in AI-generated content. Hover or click a footnote to jump straight to the source passage, highlighted in a split-screen viewer.

Cost Efficiency

ARBI-hosted **Standard models are included** at no per-credit charge — fast responses for everyday work. Switch in premium OpenAI, Anthropic or Google models at **pass-through rates, no markup**, whenever you need them.

The screenshot displays the ARBI Docs interface. On the left, a sidebar shows navigation options like 'My Sources' (21), 'In chat', and 'Document Name'. The main area features a table of sources:

View	In chat	Document Name	Status	↓ Date	Pages
		018. Template letter	✓	2025-05-06	1
		2. Procedural Order Ta...	✓	2017-01-31	7
		019. Exhibit R-0070 -	✓	2015-03-16	2
		21. Exhibit R-0036	✓	2013-03-25	114
		14. Exhibit C-0148	✓	2012-11-14	3
		11. Exhibit R-170 -	✓	2012-10-04	89
		15. Exhibit C-0051	✓	2012-03-26	5
		013. Exhibit C-0034	✓	2011-02-09	3
		5. Exhibit R-005	✓	2010-09-01	30
		20. Exhibit R-0034	✓	2010-07-22	3
		9. Exhibit R-012	✓	2010-06-28	18
		7. Exhibit R-008	✓	2007-07-05	10
		12. Exhibit C-0136 RE...	✓	2005-02-04	3

On the right, a document viewer shows the selected document '11. Exhibit R-170' in PDF format. The document content includes:

Exhibit R-170

Supreme Court of Justice, First Division,
Res. 1254-F-S1-2012

October 4, 2012

Why ARBI?

Most cloud-based AI tools weren't built for the way lawyers actually work with confidential matter material. Here's how private AI compares.

Confidentiality

Mass-market tools train on your inputs and route data through third-party clouds.

Reliability

Generative AI hallucinates and struggles to ground claims in source material.

Customisation

Generic models can't be tuned to your matter context, your workflow or your firm.

	ChatGPT MASS-MARKET	Copilot ENTERPRISE SAAS	ARBI PRIVATE AI SINGLE-TENANT
Privacy	Poor	Good	Excellent
Reliability / Verifiability	Poor	Good	Excellent
Flexibility / Customisability	Poor	Poor	Excellent
Auditability / Control	Poor	Poor	Excellent
Long-term Value	N/A	Poor	Excellent

Same per-matter discipline, same verifiable citations — whether you choose **Docs Pro** (SaaS) or **Docs Box** (dedicated).

Use Cases

E-DISCOVERY

Advanced document review

Upload ZIP archives, folder trees and mailbox exports (.mbox, .eml, .msg). Folder hierarchies preserved. Email attachments auto-extracted. Tag for privilege, relevance and custodian. AI summaries and custom AI-coded fields directly in an interactive sources table.

SECURE DATA ROOM

Controlled sharing with outside parties

Share a curated document set with external counsel, experts or counterparties without giving up control. Grant access per matter, per document or per conversation; revoke at any time. Members see only what you choose to share.

ARBITRATION RECORD

Authoritative record of a proceeding

Keep the original, unmodified file of every document, communication and submission in a matter. Text extraction is done on a copy — the source is never touched. Nothing is silently discarded. Re-process at any time without altering the underlying record.

One private AI platform — built for the work that matters.

ARBI Docs Pro

Start free, pay for usage. Each project gets its own usage-based invoice for clean client cost allocation.

WHO PRO IS FOR

Solo practitioners, small teams and arbitrators who want to start fast, scale per-matter, and bill clients directly for AI usage.

About ARBI CITY

London-based AI company. Founded 2022 by lawyers and machine-learning engineers. Privacy by design, explainable outputs, human oversight.

“ We are on a mission to empower legal professionals with the latest technology for productivity and collaboration.

Four branches, one mission

AI PRODUCT

ARBI Docs

Our private AI workspace — Docs Pro (SaaS) and Docs Box (dedicated). AI-assisted document review, pincite citations, matter-based collaboration.

DISPUTES COMMUNITY

arbi.city

Our networking platform and member directory for dispute resolution professionals worldwide — events calendar, jobs board, news feeds, free to join.

AI EDUCATION

ARBI Uni & Workshops

Our free, self-serve AI training portal for lawyers and arbitrators — plain-language explanations of the concepts behind the tools. Plus paid workshops and adoption consulting.

INFRASTRUCTURE

Whitebox & London Data Centre

Custom-built all-in-one AI device for on-premise deployments, plus our own NVIDIA GPU cluster in an ISO-27001 Tier III data centre in central London.

HEADQUARTERS

Juxon House · IDRC, London

Our office sits inside the **International Dispute Resolution Centre** at Juxon House — the premier hub for international dispute resolution in the heart of the City of London, next to St Paul's Cathedral.

Arbitration City Ltd · Juxon House, 100 St Paul's Churchyard, London EC4M 8BU, UK · support@arbi.city
